## **PipeStoppers Test Plug kit**

Introducing our new test plug kit. This handy, compact plug kit will let you test and seal pipe and tube id's from 1/2" to 4" (5", and 6" plugs available separately). Made from chemically resistant nylon these valuable plugs can withstand back pressures up to 100 PSI (depending on diameters). A threaded port through the center of each plug allows the user to attach fill and vent lines. Uses range from pressure testing automotive radiators, to weld purging, foreign material exclusion, and pipe joint/ leak testing. The handy, compact carrying case protects your investment and keeps them neat and orderly.
